USSE2 Transition Update

11/20/2014

Dear Site Operations Support Services Employees,

Today we were given approval to communicate directly with you and I want to start by thanking you all for welcoming the USSE2 team into your communities. We have waited almost two years for this opportunity and we are now ready to begin transitioning to what is a very interesting and exciting opportunity for us.

Plans are underway to hold "Town Hall" meetings in your communities to introduce our team, our leadership and our approach to executing the SOS contract. You will be receiving additional emails within the week announcing your specific town hall meeting location, date and time. For planning purposes, you can expect these meetings to take place within the first two weeks of December. Additionally we will use a portion of your meeting to request information from you that will help us in our salary and benefits offers to you. It's very important that you make every effort to attend.

Over the course of the rest of transition I will be providing you with updates on our progress. I plan to communicate using emails such as this one and will also be posting additional transition information on our website. The USSE2 web address will be shared at the town hall meetings and in subsequent emails from my leadership team.

Finally, I have been involved in several contract transitions over my 25 years in the DOE business. I fully understand the uncertainty and concerns created with a new contractor coming onboard. Rest assured we will perform this transition such that it will be as seamless as possible to you. I encourage each of you to continue to focus on performing your work safely as USSE2 works toward a contract start date of February 1st.

I look forward to personally meeting each one of you.

Sincerely,

Dane Anderson
Program Manager, NETL – Site Operations Support Services
