Contract Update

10/07/2019

Dear Site Operations Support Services Employees,

The purpose of this memo is to provide you with an update on the Site Operations Support Services contract re-bid status. The short answer is there has been no formal update since proposals were submitted on July 22nd, 2019. Unofficially, I understand DOE met last week in Morgantown to review the submitted proposals with the NETL selection team. I can tell you the Request for Proposal asked for a 90-day Transition plan. Given that our current contract ends on January 31st, an award notification would need to be made in early November to meet the contract end date assuming a 90-day transition. Obviously, our contract could be extended, the transition could be done in less than 90 days or any number of other combinations that make it difficult to anticipate when we may hear about a final award. In the meantime, please continue to focus on safe execution of work and I will update you as additional information becomes available.

Sincerely,

Dane Anderson

Program Manager, USSE2 O&M Services

NETL, Site Operations Support Services
